

Amendments to the drawings:

Figs. 1-6 have been amended to conform with the requirements of 37 C.F.R. §§ 1.83 and 1.84. Amended marked-up drawings and the proposed replacement drawings have been included with this amendment.

In Figs. 1-5, Applicants propose to add labels to blocks in the diagrams and, where indicated in the marked-up versions of the drawings, remove reference numerals from their location inside the blocks to new locations outside the blocks with lead lines to the referenced blocks. In Figs. 1-5, the lead lines have also been changed so that they do not enter the referenced block and, where indicated in the marked-up versions of the drawings, the location of some of the reference numerals has been changed. In Fig. 1, lead lines for reference 20 have been changed to 2 single lines rather than a plurality of lines. In Fig. 6, the font size of the text has been increased and the text has been capitalized. Applicants believe the replacement drawings now conform with the requirements of 37 C.F.R. §§ 1.83(a) and 1.84(o) and requests these changes be accepted.
